

IFP-001

Fiber Pedestal

Description

Designed specifically for housing passive equipment, these special pedestals feature direct-bury bases with a high rib design that do not require stakes for installation. The direct-bury pedestal bases result in a more uniform and secure installation and are less likely to lean or tilt.

An optional stake mounting provision is available for joint trench or other special applications.

A special self-locating cover security feature ensures that the pedestals lock properly without requiring special alignment.

Features

- ◆ 10" round profile provides maximum workspace and bend radius provisions for all passives,cables and connectors
- ◆ Round pedestal style maintains a consistent look with legacy pedestals in the field
- ◆ Constructed of durable, high-strength materials for maximum security and long service life
- ◆ Universal equipment mounting bracket for passives facilitates installation standardization and reduces inventory
- ◆ Optional stake mounting provision for joint trench or other special applications

Specifications

Mechanical Structure and Dimension

- ◆ Material of Housing: ASA
- ◆ Dimension:835mm(Height) x 280mm(Diameter)
